Cautiously Optimistic for the Second Half of 2023

Despite forecasters recommending caution heading into 2023, performance in the U.S. market has been surprisingly robust. The U.S. market (represented by the S&P 500 index) is up +15 per cent in local currency, to the end of June. However, despite this rally, the performance has come from a very shallow pool of stocks, with 80 per cent of that return generated by seven large tech stocks. The balance of the market (493 stocks in the S&P500) rallied by a milder +5 per cent over the same period. Despite this, we continue to remain neutrally positioned in all portfolios, as we continue to wait for the long-anticipated recession to appear as the effect of higher interest rates trickles through the economy.

Key Points:

- **Neutrally positioned:** We are cautious about short-term negative surprises and volatility in markets. All the while, taking advantage of decade-highs in rates of return on our bond investments.
- **Remain invested despite uncertainty:** We do not recommend timing the market, which is challenging for the most successful investors. Instead, in our experience it is a much better strategy to stay invested over the longer term, through a well-crafted plan suited to your specific personal objectives and risk tolerance.
- **“Safe Sectors”:** When looking back over 20+ years of market data, during periods of market volatility and general pullbacks in market that we expect, we can identify specific sectors fare better than others (Consumer Staples, Communication Services and Utilities), to help avoid the temptation to market time and remain invested.

Bottom Line: Based on our near-term expectations, we are tactically set up to be more defensively positioned within the broader context of a well-balanced and risk-appropriate portfolio.

***Please note that the commentary within this newsletter is related to the Langill & McHenry Investment Advisors Private Investment Management Group (PIMG) discretionary portfolios.*

Key Takeaways from Q2 2023:

Stocks

- North American stock markets ended Q2 of 2023 up (Q2 2023: Canada +1.1 per cent and the U.S. +8.7 per cent), led by a concentrated set of popular technology related stocks, including: Meta Platforms Inc. (META), Apple Inc (AAPL), Nvidia Corp (NVDA) and Netflix Inc (NFLX). The U.S. greenback was weak versus the Canadian loonie during the quarter (-2.0 per cent in Q2 2023), and so U.S. stock returns held by Canadian investors on a currency-adjusted basis were little changed at +6.5 per cent.
- U.S. equities have outperformed Canadian equities by +9.2 per cent over the last twelve months. As mentioned, U.S. stocks are benefitting from a larger exposure to popular technology stocks (e.g., AAPL, META, etc) while the smaller exposure to commodities (energy, materials, etc) in the U.S., which was a tailwind in 2022, has been a source of strength for the U.S. market versus their northern neighbours. In fact, looking out over a two-year timeframe, returns between the two markets are very similar (Canada = +3.0 per cent, U.S. = +3.4 per cent), in local currency annualized.
- Due to inflation concerns, monetary authorities have tightened policy to rein in demand and avoid inflation becoming entrenched. Despite the increase in policy interest rates and reduced stimulus by monetary authorities, corporate and household balance sheets are in excellent condition and should support the economy through a possible slowdown or recession in 2023/2024.

Bonds and Preferred Shares

- With historically high inflation rates, it continues to be a challenging environment for Canadian bonds in Q2 2023, which returned -0.7 per cent, but rose by +3.1 per cent over the last twelve months. A resilient consumer, supply chain bottlenecks and stimulus measures put in place due to the Covid-19 economic shutdowns, have created historically high inflation that has resulted in rising interest rates. Rising interest rates are a negative for conventional bond prices.
- After a challenging 2022, Canadian preferred shares continue to face headwinds in 2023, as the expected path of interest rates continues to be nudged higher by monetary authorities. Preferred shares fell by -2.1 per cent in Q2 2023 and have fallen -9.0 per cent over the last twelve months.

Our Models

- Our **all-equity stock** portfolios, **Dividend Growth (DG)**, **Yield & Growth (Y&G)**, rose **+3.7 per cent** and fell **-2.8 per cent** for Q2 2023 and rose **+24.0 per cent** and **5.0 per cent** over the last twelve months, relative to our benchmark at **+4.2 per cent** and **+16.8 per cent**, respectively.
- Our **Capital Preservation bond** portfolios, **DG** and **Y&G** versions, fell **-1.5 per cent** and **-2.0 per cent** for Q2 2023 and over the last twelve months rose **+0.4 per cent** and fell **-3.8 per cent**, relative to our benchmark at **-0.7 per cent** and **+3.3 per cent**, respectively.
- For our **Completion and Small Completion ("Balanced Growth")** portfolios, in Q2 2023 they rose **+2.9 per cent** and **+0.7 per cent**, while over the last twelve months they rose by **+10.4 per cent** and **+10.6 per cent**, relative to our benchmark at **+2.5 per cent** and **+12.1 per cent**, respectively.
- The top performers in our stock portfolios for Q2 2023 were **Broadcom Inc. (AVGO)** up **+35.9 per cent** in our DG portfolio, while **Restaurant Brands Intl (QSR)** rose **+14.0 per cent** to lead performance in our Y&G portfolio. In our "new" Yield portfolio, **Chartwell Retirement REIT (CSH.UT)** led all stocks rising **+12.6 per cent**. Laggards in our portfolios for Q2 2023 were **Enghouse Systems Limited (ENGH)**, falling **-15.3 per cent** in our DG portfolio, while **North West Company Inc (NWC)** fell **-15.1 per cent** in our Y&G portfolio. In our new Yield portfolio, **Walgreen Boots Alliance Inc. (WBA)**, declined **-16.4 per cent**.

- We made some changes in our models in Q2 2023, regarding specific securities held in portfolios:
 - No changes were made to our model asset allocation, as we remain strategically neutral.
 - In our Y&G model, we had a Manulife bond mature in early May. As a result, we took the matured proceeds and reinvested in a 10-year Enbridge bond maturing in September 2033 (**Enbridge Inc. 3.1% 21SEP33**).
 - In our new Yield (Y) model, we made two changes. We sold Newell Brands Inc. (NWL) and purchased **Whirlpool Corp (WHR)** with the proceeds. We also sold **Emera Inc. (EMA)** and reinvested in **Crown Castle Inc. (CCI)**.
 - Finally, in our Completion model, we switched **Horizons Active Preferred Share ETF (HPR)** for **Dynamic Active Preferred Share ETF (DXP)**.
 - No changes were made to our DG, Y&G or Small Completion portfolios during Q2 2023.

Completion Models:

If you have an account within your portfolio with < \$100,000, you may also be invested in a portfolio of investments that are outside the Dividend Growth and Yield & Growth models. We call these investments either “completion models” or “satellite holdings.” The completion and satellite portfolios help to customize all of your accounts for your unique risk tolerance, tax circumstances and liquidity needs. For a sense of the securities we own in the completion and satellite portfolios, we have listed our two completion models below.

PIMG Completion Models as of 2023-06-30, CAD

Completion & Small Completion Model Holdings:

Model Portfolio Process

When we select investment securities for our model portfolios, we follow a disciplined three step process:

1. Examine our asset mix vs. our expectations for long-term returns. This review helps guide our model portfolios allocation to cash and equivalents, fixed income (bonds and preferred shares), and equity (stocks).
2. Review our business cycle allocation vs. our expectations for broad market. We then allocate to sectors of the market and security factors that are expected to perform well.
3. Assess securities for inclusion in the portfolio based on: (i) Dividend growth, (ii) Leverage, (iii) Valuation and (iv) Market structure. Securities reflecting these features are typically of higher quality than average.

After the third step is complete, we include a portfolio of investment securities in our model portfolios reflecting our expectations for the market going forward.

Our Investor Profiles and Asset Allocations:

LANGILL & MCHENRY MODEL ASSET ALLOCATION

Asset Allocation	Cash %	Fixed Income %	Equity %
Capital Preservation	3.00%	97.00%	0.00%

Benchmark All Equity	0.00%	0.00%	100.00%

*Note: Benchmark comprised of proportions Exchange Traded Funds (ETFs) XBB, XIC and IVV.

Model Portfolio Management Philosophy

Portfolio Objectives for Dividend Growth (DG), Yield & Growth (Y&G) and Yield (Y):

- We designed both model portfolios with a conservative investment approach. The portfolios may not participate as much in gains when markets are rising. However, they are expected to be more resilient in falling markets to protect capital. As a result, the portfolios will tend to be less volatile, and capital will be given more opportunity to compound over a long-period of time.

Dividend Growth (DG):

- Equity allocation = ~20 stocks (~10 Canada, ~10 US), dividend growth target +6 per cent/yr, dividend yield target +0 per cent

Yield & Growth (Y&G):

- Equity allocation = ~20 stocks (~10 Canada, ~10 US), dividend growth target +0 per cent/yr, dividend yield target +2.5 per cent

Yield (Y): (*NEW*)

- Equity allocation = ~20 stocks (~10 Canada, ~10 US), dividend growth target at least 0 per cent/yr, dividend yield target +5.0 per cent

Other Portfolio Parameters (both DG, Y&G and Y):

- ~18 models with different asset allocation based on risk and return objectives including: Capital Preservation, Income, Balanced Income, Balanced Growth, Growth and All Equity
- Negligible embedded cost
- Fixed Income allocation = ~4-9 bonds, ~2-4 preferred shares, investment grade credit, short and laddered duration (<7 years)
- Diversify by geography, sector and style
- Large capitalization (“blue chip”)
