Current Attractive Short-Term Banker's Notes		
Issuer	Maturity Date	Yield to Maturity
Schedule 1 Bank	1 Month	4.85%
Schedule 1 Bank	2 Months	4.85%
Schedule 1 Bank	3 Months	4.85%

## Featured Structured Solution of the Month

*Condo boards must be more creative in today's ultra-low-rate environment to earn a legitimate return on their reserve fund. Thankfully, there are structured products available, which offer principal protection, as well as equity market participation to help gain more meaningful returns in your reserve fund.*

### National Bank Autocallable Canadian Equity Flex GIC

This is an interesting structure of a market-linked GIC which offers potential seven per cent/year coupons. Based on a basket of 10 large Canadian stocks, on annual valuation dates, if the underlying basket of stocks is at all positive, the GIC is "called" away and the investor receives back their principal as well as a seven per cent coupon. If the basket is down, it would then go to the second annual valuation date, where if the basket is at all positive, the GIC is called away with a 14 per cent coupon (seven per cent per year). If the basket is down on all seven annual valuation dates (the seventh would pay a 49 per cent coupon, if up), then the investor receives back their full principal with no interest. The likelihood is that such a GIC would be called away in one of the early years, but there is a chance that it may not be. If it is not called, it is however not locked in. You can sell the GIC any time after year one at the prevailing market price (this is likely to be below the purchase price, if the underlying basket of stocks is down). However, this liquidity can be seen as a benefit, as

it can trade up, or close to par, and the investor would ensure they are always able to hold until maturity in the worst-case scenario, and the full principal is protected at maturity.

**Highlights:**

- Seven-year term
- Based on 10 Canadian blue-chip stocks (BCE, BNS, CM, ENB, GWO, MFC, PPL, T, TD, TRP)
- Seven per cent/year coupon when called (annual valuation date if basket of stocks is positive)
- Principal protected (at maturity) by National Bank and by CDIC (up to CDIC limit)

Overall, with rates where they currently are, condominium corporations are likely best off to lock in the current guaranteed rates for as long as their cash flow plan allows. Although the terms on market-linked GICs are very attractive, the opportunity cost of foregoing the currently high guaranteed rates are also high.
